

I specifically support strong net neutrality backed by title II oversight of ISPs. The internet is a vital utility and for-profit ISPs should not be able to treat customers like commodities by preferential pay to play sales of a service that WE, CONSUMERS, are already paying for! ISPs should be working in the best interest of consumers. Allowing ISPs to charge different content providers for differential service does NOT increase competition and lower rates. The increased cost would be born by consumers who already pay more for shitty quality internet service than the rest of the developed world. STOP SELLING OUT TO CORPORATE INTERESTS!!!!
